INDUSTRIAL VISITS

Visits to a wide range of industries and technical exhibitions are regularly arranged to keep the students abreast of the conditions prevailing in his / her field of study. Thus the students, undergoing the co-curricular training programmes, get multi-faceted exposure to his / her engineering discipline.

INTERNSHIP

Apart from the rich internal content, significant external and real-world exposure is imparted to our students by means of Industrial visits, projects at outside industries, and for Sandwich students, an entire semester of external Industry Internship where students report for three months at a real Industry. Many of our students also opt to do this Internship at overseas companies across the globe, and travel to countries like the USA, Germany, France, Saudi Arabia and Dubai.

This pre-final year Internship prepares students to meet real –life challenges and learn state of the –art global technology and process to add to their core technology foundation.

KAIZEN APPROACH IN TRAINING EFFECTIVENESS

As part of continuous improvements in Training effectiveness, additional training related infrastructure like exclusive study centers for mechanical, electrical & electronics and appliances, maintenance & re-conditioning cells, hands-on experience cells in each division are set up. Executive Skill Development Programme (ESDP) and Supervisory Skill Development Programme (SSDP) are also being conducted exclusively to Sandwich students prior to their placement, which enhances their market-readiness, and multiplies their opportunities.

TRAINING METHODOLOGY – BLOOM'S TAXONOMY

The entire Training Curriculum is modelled on the Bloom's Taxonomy Methodology, imparting the right mix of cognitive, affective and psychomotor skills to the students. This provides students the right blend of skills required to make them Industry-ready, and puts them on the Placement fast-track.

SOFTWARE TOOLS & VIDEO-BASED TRAINING

With all fields of technology using the power of software tools and packages supplemented by video-based training, our Sandwich students are exposed to the power and capabilities of various software tools related to their branches – Manufacturing / Mechanical, Electrical and Textile Technology. This enables our students to be better prepared to face and manage real-world challenges using the capabilities of such tools.
